Jude Francis

Software Engineer

Lagos, Nigeria · hello@judecod.es · judecod.es · linkedin.com/in/judecodes · github.com/jsbuddy

SUMMARY

Software engineer with 8+ years building products people actually use, currently at StatiSense. I work across the stack: React and Next.js on the front, Python and Node on the back, with AI agents increasingly tying it together. Most of that has been on products for emerging markets in fintech, real estate, and data analytics.

EXPERIENCE

Chief Technology Officer, StatiSense

Lagos, Nigeria · Sep 2023 - Present

- Set the technical direction for our products and lead the work on Immortal BI, our self-serve business intelligence platform.
- Work across the B2C, B2B, and B2G products, from the data pipelines at the bottom to the dashboards customers rely on.
- Drive how AI is integrated across products, deciding where it genuinely helps clients make decisions and where it would just be decoration.

Head of Engineering, StatiSense

Lagos, Nigeria · Jan 2023 - Aug 2023

- Guided the engineering team through the full product lifecycle, from ideation to launch.
- Kept engineering, product, and design aligned; mentored engineers and championed best practices.

Lead Frontend Developer, Clan

Lagos, Nigeria · Jan 2022 - Sep 2023

- Led the frontend team at a buy-now-pay-later company making split payments easier across Africa.
- Built scalable, maintainable frontend systems and turned design mockups into polished, fast, responsive interfaces.

Founding Engineer, Cribstock

Lagos, Nigeria · Part-time · May 2021 - Present

- Founding engineer on a platform democratizing property ownership through fractional real estate, letting young Nigerians co-own property instead of waiting years to afford a whole place.
- Architect scalable frontend for real-time rental income tracking and portfolio management.

Frontend Developer, Clan

Lagos, Nigeria · Sep 2018 - Dec 2021

- Built user interfaces that made split payments simple for customers and merchants.
- Shipped features with cross-functional teams, optimized performance, and baked in accessibility.

PROJECTS

Immortal BI (usebi.co)

Next.js · TypeScript · Python · PostgreSQL · Tailwind CSS

A self-serve business intelligence platform for building dashboards and reports. I lead the team and build alongside them, from the data-modeling layer to the dashboard builder.

StatiSense (statisense.co)

Next.js · TypeScript · Python · FastAPI · PostgreSQL

An AI-driven data insights platform turning fragmented data into clear insights for businesses, from identity verification to capital markets.

Cribstock (cribstock.com)

React · Next.js · TypeScript · Tailwind CSS

A fractional real estate platform letting people co-own property and earn rental income. I own the frontend: portfolio dashboard, real-time income tracking, and investment flows.

Crossheirs (crossheirs.com.ng)

Next.js · TypeScript · Tailwind CSS

A multidisciplinary consultancy for African enterprises. I designed and built their website and digital presence.

Opinions (opinions.statisense.co)

React · TypeScript · Tailwind CSS

A social platform for sharing and debating opinions, with posting, discussion, and moderation tooling.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, Node.js, Bun, React, Next.js, Tailwind CSS, LangChain, FastAPI

Databases & Tools: PostgreSQL, Git/GitHub, Docker, Figma, VS Code, Cursor

Focus areas: AI agents, SaaS platforms, full-stack web apps, business intelligence & data products
